

Layout for future features

For the future features we want to expand on our features. For Partaps's navbar it should be at the very top of the webpage, have a white background with black text. Then it should have links to different pages on the website and these links should follow the style guide. For Nahom's header we want to have a dark blue background and perhaps add in a background image to make the header look more appealing. It should also have the website title in it and it should follow the style guide that we listed below. Then we just want to list some important information such as email, phone number and other ways users can contact us. Some other features that we want is a match list, preferences and recommended pages, they all should contain either a blue or purple background with white text. We have some more features that we want to implement but for now we are just keeping our options open just in case we need to edit our style guide or future features.

Content and Assets

For the content we want users to login and make their own accounts for the dating website. Another part we want to add is a friends list. We want users to add people as friends and let them see who they added in a list. Some Assets that we plan on adding would be some images that help make the website look nicer.

Style Guide

For the header, footer and main parts of the page we want to use a colour similar to #0a91e7, which is a shade of blue or a white background for other portions such as the navbar. Then we want to make the text colour white to help with readability. Any important text will be highlighted in light green or #37a328. For the font we want to use 'Emily's Candy' for any heading element and 'Crimson Text' for all other texts. For the website title in the header it will be an <h1> tag and all other titles will be in <h3>. For paragraph font size we want to use ~20px and for headings ~30px. Any buttons or links that we have, we want their text to be in white and background colour to be light green. Any miscellaneous elements that we are thinking of adding include a match list, icons, images and a checkbox. The footer has a background color of #262BD4 and the text is white with a background of #242785.
